

TECHNICAL DATASHEET FOR PLUSHER SERIES AUTOMATED LOADING / UNLOADING SYSTEMS

A higher level of quality and efficiency create higher demands on medical personnel and equipment. In spite of new technology, some work still overwhelms today's medical personnel. Our products provide simpler and more effective solutions for work in operating departments and central sterilization departments.

The loading systems have been developed in order to create a more effective handling of goods at the hospital, without creating strain on the personnel.

Automatic Loader - Unloader

System for big sterilization departments, that allows the automation of loading and unloading operations. The loading and unloading operations are easy and intuitive: the washing trolley is automatically transported in front of the door, which, if the device is free, automatically opens. The trolley is shoved all the way in the washing chamber, the door closes and the specific cycle for the inserted trolley starts. When the cycle is complete, the unloading door opens and, if the unloading system is free, the trolley is transported on it. The system is modular, to adapt to every kind of department configuration, and can house 2 or more trolleys both on the loading and on the unloading zone. If that is the case, of course, a controller takes care of avoiding any kind of impact between trolleys.

System is compatible with automatic vertical sliding door models of PLUSHER WDS 12 and PLUSHER WDS 18 series. It is a modular system, which can house 2 or more trolleys, both in the loading and the unloading zone.

2

Trolley Number	"A" Dimensions	"B" Dimension
1	1180 mm.	3260 mm.
2	2050 mm.	5000 mm.
3	2920 mm.	6740 mm.

Reference No	Description
313097	Automatic Loader For PLUSHER WDS 12 And PLUSHER WDS 18
313098	Automatic Unloader For PLUSHER WDS 12 And PLUSHER WDS 18
